

## Dylon Leather Shoe Dye Instructions

### **Product Information**

- Dylon Leather Shoe Dye will change or restore the colour of your leather shoes or boots.
- This product is a dye, so the original colour of the shoe will affect the final result.
- Dark shoes cannot be dyed to a lighter colour.
- One pack will dye one pair of average size shoes or small boots.
- For Leather Shoes and Boots only.
- Do not use on waterproofed leather, suede, nubuck, plastic, rubber or patent leather.

### **How to use**

1. Wear rubber gloves and cover work surface with newspaper before dyeing.
2. Prepare shoes for dyeing by cleaning with methylated or white spirit. Allow to dry.
3. Shake bottle and pour dye into an old saucer or small container.
4. Apply the dye evenly using the brush provided.
5. Allow to dry and add a further coat if necessary.
6. When dry polish with your usual shoe polish.
